Sentien Privacy Policy

Last updated: January 29, 2026

What data does Sentien access?

Sentien requests the following device permissions:

- **Phone State (READ_PHONE_STATE)** — Used solely to detect if a phone call is in progress, so the app does not interrupt active calls when launching ChatGPT voice. Sentien does not read, store, or transmit your phone number, call history, or any telephony data.
- **Bluetooth** — Used to connect to your wireless headset. No Bluetooth data is stored or transmitted.
- **Notifications** — Used to display the background service notification while connected to your headset.
- **Display over other apps** — Used to show a floating button for ending ChatGPT voice conversations.

Data collection

Sentien does not collect, store, or share any personal data. Voice conversations are handled entirely by the ChatGPT app — Sentien only launches it.

Analytics

Sentien uses Firebase Analytics and Crashlytics to collect anonymous usage statistics and crash reports to improve app stability. No personally identifiable information is collected.

Third-party services

- **ChatGPT (OpenAI)** — Voice conversations are subject to OpenAI's privacy policy.
- **Firebase (Google)** — Anonymous analytics and crash reporting are subject to Google's privacy policy.
